SKILLS

Front End Coding

- HTML
- CSS
- React
- Bootstrap
- Material UI
- Thymeleaf

Back End Coding

- Node.js
- Express
- Java
- Spring Boot

Database

- MySQL

Scripting Language

- JavaScript

Tools

- GIT
- GitHub
- GitLab
- Docker
- Google Cloud Platform

EXPERIENCE

APPLICATION DEVELOPER

TELUS International Digital Solutions

September 2021 – May 2023

- Wrote quality code to complete applications within the schedule.
- Worked using Agile methodology to develop design and direction for new applications.
- Tested sample data sets and analyzed test results to verify that program output works as intended, correcting code to produce the required output.
- Analyzed existing programs to determine improvements and enhancements needed for better performance.
- Worked using the Jira application to track issues, manage projects, and automate workflows.
- Coded prototypes of applications before developing final products to gather feedback and for demonstration purposes.
- Skillfully fault-found and debugged software application issues within deadlines, offering solutions to fix detected bugs.
- Reference manuals, periodicals, and other technical documents to update existing skill sets and learn new methods of developing programs.
- Coordinated changes and stakeholders during the application's lifecycle to facilitate smooth development, deployment, and post-deployment operations.
- Deployed applications to demonstrate the successful performance of software, fulfilling clients' expectations.

EDUCATION

FULL STACK WEB DEVELOPMENT – PART TIME

Uplift Code Camp
February 2021 - July 2021

FLIGHT DISPATCHER

Flight School International, Inc.
August 2016 - July 2017

BACHELOR OF SCIENCE IN AIR TRANSPORTATION

Philippine Air Transport and Training
Services College of Aeronautics
July 2009 - October 2015

FLIGHT OPERATION OFFICER

Philippine Airport Ground Solution Services Inc.
November 2018 – October 2020

- Monitored flight departures and arrivals against planned schedules, making adaptations to accommodate delays with minimal disruption.
- Relayed communications between operators and carriers to deliver commercial flight requirements.
- Communicated clear, concise instructions to aircraft teams for reliable, safe flight operations.
- Applied for the required permits to certify crew and aircraft rights to fly.
- Planned and prioritized well to confirm flight readiness ahead of agreed-upon takeoff slots.
- Led handling agents, fuel teams, and customs crews in delivering prompt aircraft turnarounds.
- Observed ground and air traffic to determine flight adherence to schedules, updating systems to reflect real-time updates.
