Van Arden Mercado

FULL STACK DEVELOPER

I aim to expand my learning and deliver professional growth, ready to tackle programming tasks. Willingness to actively engage in end-to-end application development, contribute ideas, manage personal tasks, and meet team needs.

EXPERIENCE

APPLICATION DEVELOPER
TELUS International Digital Solutions
September 2021 – May 2023

- Worked with Agile methodology to develop designs and directions for new and current apps.
- Tested sample data sets and examined test findings to ensure that program output works as expected, correcting code to achieve the desired output.
- Used Jira Software to track issues, manage projects, and automate workflows.
- Deployed applications to demonstrate successful performance.

Project:

Skills Matrix App

It is used to monitor skill levels based on the technologies being utilized and determine what will be required to develop specific abilities or technologies.

Features:
Admin
- Team performance can be monitored.
- Ability to approve a submitted team member's skill level

Team Member
- Monitor own profile.
- Add, edit, and delete skills or technologies.
- Rate the proficiency level depending on the specific skill or technology.

FLIGHT OPERATION OFFICER
Philippine Airport Ground Solution Services Inc.
November 2018 – October 2020

- Reliably communicated with operators and airlines to meet commercial flight standards.
- Applied for the necessary permits to certify the crew and aircraft's rights to fly.
